

Floor-ceiling type indoor unit

The indoor unit of the floor-ceiling type has two installation methods: on the floor and on the ceiling. It can be widely used in hotels, office buildings, shopping centers, apartments, cottages, etc.

HEALTH	COMFORT MANAGEMENT						INTELLIGENT CONTROL				TECHNOLOGICAL		
													
Mode SLEEP	ECO-FRESH	Timer	LED display	Turbo mode	Multi speed fan	Wi-Fi	Dehumidification mode	Anti Freeze protection	Auto restart	Self diagnostics	Wired controller connection	Coating BLUE-FIN	Silent mode

Flexible installation

The device can be mounted on the floor (vertical) or ceiling (horizontal); the flexible and convenient installation method can give customers more options and makes this indoor unit versatile.

Fresh air supply function

An air duct can be connected to the unit for supplying fresh air.

Long-distance Air Supply

Air volume two-stage pressurization technology

- Unique backflow prevention fan blade can avoid secondary backflow of air supply and improve the efficiency of air supply.
- The application of cavity variation technology changes the fluid cross-sectional area, creating a secondary pressure boost that increases the air supply distance by 2.5%.

Integrated backflow prevention board

2-way Air Return

The 2-way air return design enlarges air return area and increases air volume by 7%.

Large-angle Swing Design

The swing louvers adopt independent distribution design, which allows the left and right air outlet angles to be adjusted freely according to different applications.

Easy installation

Adjust the angle of the air outlet to prevent the ceiling from affecting the air distribution.

1) Design with hidden fasteners

2) Connection of connecting pipelines from different directions.

3) Hidden side electrical box design. Cables can be connected by removing only the side cover.

Silent design

The new design of the fan blade to reduce the noise level, combined with the DC motor and improved sound insulation, allows you to achieve optimal air flow, its uniform supply and lower noise level, creating a quiet and comfortable environment.

Convenient for Wiring and Piping

Automatic fault diagnosis: equipped with a microcomputer, the unit can automatically diagnose faults and display corresponding codes (on the LED panel of the indoor unit, the main board of the outdoor unit and the wired controller) for easy maintenance.

Easy connection: wires can be connected by detaching the handle. There is no need to open the front panel.

Easy pipe connections: the entire range offers external valves, all with protective caps, for easy pipe connections.

Built-in front cover: simple appearance, fewer components, easy to disassemble.
